

# Basic = Intermediate = Advanced

## REFORMATTED PEDIATRIC INTENSITY LEVEL OF THERAPY SCORE

<input type="radio"/> No	<input type="radio"/> Yes	Head elevation for ICP control
<input type="radio"/> No	<input type="radio"/> Yes	Nursed flat (180°) for CPP management
<input type="radio"/> No	<input type="radio"/> Yes	Sedation (low dose as required for mechanical ventilation)
<input type="radio"/> No	<input type="radio"/> Yes	Higher dose sedation for ICP control (pentobarbital $\leq$ 36 mg/kg)
<input type="radio"/> No	<input type="radio"/> Yes	Metabolic suppression for ICP control with high dose sedation (pentobarbital $>$ 36 mg/kg)
<input type="radio"/> No	<input type="radio"/> Yes	Neuromuscular blockade
<input type="radio"/> No	<input type="radio"/> Yes	Ventricular CSF drainage 0-11 times/24 hours
<input type="radio"/> No	<input type="radio"/> Yes	Ventricular CSF drainage 12-23 times/24 hours
<input type="radio"/> No	<input type="radio"/> Yes	Ventricular CSF drainage $>$ 24 times/24 hours
<input type="radio"/> No	<input type="radio"/> Yes	Lumbar CSF drainage
<input type="radio"/> No	<input type="radio"/> Yes	Induced hypertension ( $\geq$ 95 <sup>th</sup> percentile for age)
<input type="radio"/> No	<input type="radio"/> Yes	Moderate hypocapnia for ICP control (PaCO <sub>2</sub> 32-35mmHg)
<input type="radio"/> No	<input type="radio"/> Yes	Intensive hypocapnia for ICP control (PaCO <sub>2</sub> $<$ 32 mmHg)
<input type="radio"/> No	<input type="radio"/> Yes	Hyperosmolar therapy with mannitol $\leq$ 1 g/kg/24 hours
<input type="radio"/> No	<input type="radio"/> Yes	Hyperosmolar therapy with mannitol 1.1-2 g/kg/24 hours
<input type="radio"/> No	<input type="radio"/> Yes	Hyperosmolar therapy with mannitol $>$ 2 g/kg/24 hours
<input type="radio"/> No	<input type="radio"/> Yes	Hypertonic saline (any dose or rate, regardless of serum [Na])
<input type="radio"/> No	<input type="radio"/> Yes	Treatment of fever (temp. $>$ 38,5°C) or spontaneous temp. of $<$ 34,5°C
<input type="radio"/> No	<input type="radio"/> Yes	Mild hypothermia for ICP control with a lower limit of 35°C
<input type="radio"/> No	<input type="radio"/> Yes	Hypothermia below 35°C
<input type="radio"/> No	<input type="radio"/> Yes	Intracranial operation for progressive mass lesion, not scheduled on admission
<input type="radio"/> No	<input type="radio"/> Yes	Decompressive craniectomy
